OX-300 REFLECTIVE WALL PANELS

Oelex Acoustical Wall Panels by Oeler Industries, Inc. are the solution for areas that require noise reduction and are available in a variety of models for various applications. The OX-300 Wall Panel is manufactured specifically as a flat reflector panel that offers sound reflection. Application for the OX-300 panels includes auditoriums, concert halls, churches and any area where sound reflection is necessary to enhance the room acoustics.

O-X300 Reflective Wall Panels are frequently used in conjunction with our Ox-200 absorber panels. The combination of both panels provides the absorption and reflection necessary to enhance the room acoustics by reflecting and absorbing excessive sound thereby improving the quality of sound and speech understanding.

OX-300 panels are manufactured with an MDF core in thickness to match OX-200 panels or standard thickness of 1/2", 3/4" and 3/4" with sizes up to a maximum of 4' x 10'. The edges are fully wrapped in standard, designer or C.O.M. fabric with 4 edge detail options.

OX-300 panels are lightweight and easily installed on walls with a two-part mechanical clips or nails and construction adhesive.

FEATURES:

- Reflective properties for excellent sound quality and clarity
- Class A fire rated
- Standard, designer or C.O.M. fabric

Intelligent Acoustic Solutions
